## PERSONAL PROJECTS

### **This Is Digital**

- A Fully Responsive Frontend Project that's a clone of the Website This Is Digital .

### **Neverland Agency**

- An Awwwards Website Clone With use of multiple JS libraries like locomotive.js, Scroll Trigger and GSAP..

### **Automated Folder Generator For FrontEnd Development**

- As people have to create the web folders and multiple files each time, so just run the code, enter the file name and boom, folder and files created!

### **PUNTA**

- A Fully Responsive Project

### **ChatApp**

- This is a complete MERN stack project in React where users can log in and engage in real-time chat with each other.

### **Hunger Bounce**

It is a pizza delivery app created using the Node.js full-stack web development framework. The app allows users to place pizza orders. The user interface (UI) design is implemented using EJS (Embedded JavaScript) technology. The data is stored in a MongoDB database in JSON format. The app features a complete authentication system using the Passport Node library, allowing users to log in and sign up. Additionally, the app utilizes Socket.IO for real-time chat functionality, enabling users to communicate with the restaurant or raise any complaints. A secure payment gateway is integrated for convenient payment processing. Furthermore, the app includes an "Add to Cart" feature, implemented using Node.js.

### **Sanitation-Xpress**

This is a fully Java project that enables individuals to book sanitization services and effectively manage their bookings using Eclipse technology and MySQL for the database.
